

RE: LPFM. I'm told this may replace the K-LOVE signal I now receive via FM translator. I am against this as I listen to K-love every day, it provides a valuable service to me as well as the local community and is the only source of this type of programming available locally. We already have numerous providers of every other type of programming. If you approve this you will be doing me, my community and many other communities across the nation a terrible disservice
